TECHNICAL REPORT  
OF THE  
AERONAUTICAL RESEARCH  
COMMITTEE

FOR THE YEAR 1935-1936

VOL. I  
Aerodynamics

Price £1 10s. od. net

## FOREWORD

Since issuing their last Technical Report, the A.R.C. have changed both the period covered by their Annual Report and the style of their publications. The present Technical Report which contains the Reports and Memoranda issued during the period April 1st, 1935 to March 31st, 1936, is the last of the volumes to be published in the old style.

The next Technical Report will contain the Annual Report of the Committee covering the period April 1st, 1935 to December 31st, 1936, and subsequent Technical Reports will contain both an Annual Report covering the calendar year and the Reports and Memoranda issued during that year.

J. L. NAYLER,  
*Secretary.*

# CONTENTS

## VOLUME I

	PAGE
FOREWORD - - - - -	ii
Members of the Committee. March, 1936 - - - - -	viii
AERODYNAMICS :	
(a) Fluid Motion :—	
(i) Measurement of profile drag by the pitot-traverse method.—The Cambridge University Aeronautics Laboratory. (R. & M. No. 1688) - - - - -	1
(ii) Comparative measurements of turbulence by three methods.—The Staff of the Aerodynamics Department, National Physical Laboratory. (R. & M. No. 1651) - - - - -	47
(iii) Statistical measurements of turbulence.—H. C. H. Townend, D.Sc. (R. & M. No. 1655) - - - - -	64
(iv) Note on boundary layer flow.—H. B. Squire, M.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1664) - - - - -	74
(v) Laminar boundary layer on the surface of a sphere in a uniform stream.—S. Tomotika, B.Sc. (R. & M. No. 1678) - - - - -	86
(vi) Two-dimensional flow of compressible fluids at subsonic speeds past elliptic cylinders.—S. G. Hooker, D.Phil. (R. & M. No. 1684) - - - - -	100
(vii) Rolling up of the surface of discontinuity behind an aerofoil of finite span.—F. L. Westwater. (R. & M. No. 1692) - - - - -	116
(viii) Influence of a uniform jet on the lift of an aerofoil.—H. Glauert, F.R.S. (Revised by H. B. Squire, M.A., December, 1935.) Communicated by D.S.R., Air Ministry. (R. & M. No. 1602) - - - - -	132
(b) Performance :—	
(i) Expanding passages on aircraft.—F. B. Bradfield, M.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1661) - - - - -	146
(ii) Effect of weight on take-off and landing.—E. Finn, B.Sc., and S. P. Osborne, B.Sc. Communicated by D.S.R., Air Ministry. (R. & M. No. 1682) - - - - -	151
(iii) Performance and longitudinal stability of a single-engined high wing monoplane. Experiments on a quarter scale model with airscrew running.—L. W. Bryant, A.R.C.Sc., D. H. Williams, B.Sc., and A. F. Brown, B.Sc. (R. & M. No. 1687) - - - - -	164
(c) Airscrews :—	
(i) Wind tunnel tests of high pitch airscrews (Part I).—C. N. H. Lock, M.A., H. Bateman, B.Sc., and H. L. Nixon. (R. & M. No. 1673) - - - - -	195
(ii) Graphical method of calculating performance of an airscrew.—C. N. H. Lock, M.A. (R. & M. No. 1675) - - - - -	224
(iii) Tables for use in an improved method of airscrew strip theory calculation.—C. N. H. Lock, M.A., and D. Yeatman. (R. & M. No. 1674) - - - - -	254

AERODYNAMICS—*contd.*

## (d) Stability and Control :—

- (i) Full scale tests on longitudinal control of a low-wing monoplane with special reference to wing wake.—J. E. Serby, B.A., and R. P. Alston, B.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1666) - 281
- (ii) Split flaps and other devices for facilitating landing.—S. B. Gates, M.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1659) - - - 293
- (iii) Rolling and yawing moments on half wings with various modifications of wing tips.—D. H. Williams, B.Sc. (R. & M. No. 1665) - - - 305
- (iv) Flight tests on an Atlas fitted with autoslots having various link arrangements.—W. G. Jennings, B.Sc. Communicated by D.S.R., Air Ministry. (R. & M. No. 1677) - - - 311
- (v) Experiments on a small chord flap on a Clark YH aerofoil in the Compressed Air Tunnel.—D. H. Williams, B.Sc., and A. F. Brown, B.Sc. (R. & M. No. 1681) - - - 318

## (e) Spinning :—

- (i) Spinning of a Bristol Fighter model including effect of wing tip slots and interceptors.—H. B. Irving, B.Sc., A. S. Batson, B.Sc., and J. H. Warsap. (R. & M. No. 1654) - - - 332
- (ii) Slots and interceptors in spins.—S. B. Gates, M.A., H. B. Irving, B.Sc., R. P. Alston, B.A., and A. V. Stephens, M.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1660) - - - 351
- (iii) Contribution of body and tail of an aeroplane to the yawing moment in a spin.—H. B. Irving, B.Sc., A. S. Batson, B.Sc., and J. H. Warsap. (R. & M. No. 1689) 380
- (iv) Air density effect in spinning.—S. B. Gates, M.A., and A. V. Stephens, M.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1663) - - - 396

## VOLUME II

## STRUCTURES :

- (i) Flexural and shear deflections of metal spars.—I. J. Gerard, M.Sc., A.M.I.C.E., and H. Boden, B.Sc.(Eng.). Communicated by D.S.R., Air Ministry. (R. & M. No. 1671) - - - 403
- (ii) Stressing of aeroplane wings due to symmetrical gusts.—L. W. Bryant, A.R.C.Sc., and I. M. W. Jones. (R. & M. No. 1690) - - - 416
- (iii) A distribution method of stress analysis.—Professor J. F. Baker, M.A., D.Sc., M.I.Struct.E., Assoc.M.Inst. C.E., and A. J. Ockleston, B.E.(N.Z.). (R. & M. No. 1667) - - - 436
- (iv) Successive approximation method of solving continuous beam problem.—D. Williams, B.Sc., A.M.I.Mech.E. Communicated by D.S.R., Air Ministry. (R. & M. No. 1670) - - - 511

STRUCTURES—*contd.*

- (v) Loads and bending moments in members of a plane braced frame with rigid joints.—J. Morris, B.A., A.F.R.Ae.S. Communicated by D.S.R., Air Ministry. (R. & M. No. 1672) . . . . . 532
- (vi) Abstract. Stress-calculation in frameworks by the method of "systematic relaxation of constraints"—I, II and III.—R. V. Southwell, F.R.S. (R. & M. No. 1668) . . . . . 574
- (vii) Abstract. On the synthesis and analysis of simply-stiff frameworks.—H. Roxbee Cox, Ph.D., D.I.C., B.Sc. Communicated by D.S.R., Air Ministry. (R. & M. No. 1680) . . . . . 576
- (viii) Stability of a monocoque in compression.—J. L. Taylor, D.Sc., of the Design Staff of Sir W. G. Armstrong Whitworth Aircraft, Ltd. (R. & M. No. 1679) . . . . . 578
- (ix) A routine method of stressing for three-ply covered fuselages, with special reference to some mechanical tests on a particular fuselage.—H. Davis, B.Sc., D.I.C. Communicated by D.S.R., Air Ministry. (R. & M. No. 1694) - . . . . . 587
- (x) Behaviour in bending of thin-walled tubes and channels.—D. Williams, B.Sc., A.M.I.Mech.E. Communicated by D.S.R., Air Ministry. (R. & M. No. 1669) . . . . . 591

## FLUTTER :

- (i) Effect of variation of aileron inertia and damping on flexural-aileron flutter of a typical cantilever wing.—V. M. Falkner, B.Sc., A.M.I.Mech.E. (R. & M. No. 1685) . . . . . 604
- (ii) Flutter experiments on a model wing fitted with a dead-centre aileron control.—V. M. Falkner, B.Sc., A.M.I.Mech.E., W. P. Jones, B.A., and C. Scruton, B.Sc. (R. & M. No. 1686) . . . . . 616
- (iii) Experiments on servo-rudder flutter.—W. J. Duncan, D.Sc., A.M.I.Mech.E., D. L. Ellis, B.Sc., A.R.T.C., and A. G. Gadd. (R. & M. No. 1652) . . . . . 626

## ENGINES :

- (i) Air and vapour locks in fuel systems.—M. A. A. Allfrey, B.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1693) - . . . . . 656
- (ii) Heat dissipation of ethylene glycol radiators and comparison with water radiators.—C. Anderton Brown, A.M.I.Mech.E., and F. G. Barlow, B.Sc. Communicated by D.S.R., Air Ministry. (R. & M. No. 1696) . . . . . 670
- (iii) Cooling of aircraft engines. With special reference to ethylene glycol radiators enclosed in ducts.—F. W. Meredith, B.A. Communicated by D.S.R., Air Ministry. (R. & M. No. 1683) - . . . . . 699
- (iv) Abstract. Ice formation in carburettors.—W. C. Clothier, M.Sc., Wh.Sch. Communicated by D.S.R., Air Ministry. (R. & M. No. 1676) . . . . . 712

## SEAPLANES :

- (i) Static stability tests of six full scale twin float seaplanes.—R. K. Cushing, A. S. Crouch, D.I.C., A.C.G.I., and R. W. Angell. Communicated by D.S.R., Air Ministry. (R. & M. No. 1653) - - - - 714
- (ii) Effect of wing setting on water performance of seaplanes.—W. G. A. Perring, R.N.C. Communicated by D.S.R., Air Ministry. (R. & M. No. 1656) - - - 734
- (iii) Water performance of seaplanes. Tank data to determine effect of wind, variation of loading or a change of air structure.—W. G. A. Perring, R.N.C. Communicated by D.S.R., Air Ministry. (R. & M. No. 1657) - - - - - 742

## WIND TUNNELS :

- (i) Effect of static pressure along the axis of an open jet tunnel of (a) Nozzle flare, and (b) A ring in the collector.—F. B. Bradfield, M.A., and G. F. Midwood. Communicated by D.S.R., Air Ministry. (R. & M. No. 1695) - - - - - 746
- (ii) Turbulence tests of the R.A.E. Wind tunnels.—R. G. Harris, M.A., D.Sc., F.R.S.E., and A. Graham, M.Sc., D.I.C. Communicated by D.S.R., Air Ministry. (R. & M. No. 1662) - - - - - 749

## INSTRUMENTS :

- (i) Abstract. A new surface extensometer.—T. W. K. Clarke, B.A., F.R.Ae.S. Communicated by D.S.R., Air Ministry. (R. & M. No. 1658) - - - - 755
